

Course of Study Sample for Collegiate Teaching

Studio of Kristen Collins

Contact: kristen.collins1@louisiana.edu OR ksctrombone@gmail.com

Noted below are my suggestions for a trombone major ascending through college, starting freshman year. This comprehensive course of study includes material for students studying classical trombone and jazz trombone. Lesson content will vary by student. Students do not always need to necessarily follow this and this alone. This course of study is a guideline, and each lesson experience will be tailored to the student and their individual needs. There is a comprehensive list for both tenor trombone and for bass trombone.

All students are expected to own a few different lesson books, but this will vary by year, and each student's individual study. All classical trombone students can start with owning-

Melodious Etudes for Trombone, Bordogni and Rochut

Introducing the Tenor Clef, Reginald Fink

60 Studies, Georg Kopprasch

Clarke Studies, Herbert L Clarke

All jazz trombone students can start with owning-

Scales for Jazz Improvisation, Dan Hearle

The Real Book: Bass Clef Edition Vol. 6, Hal Leonard

iReal Pro, phone application for iphone or android

Electronic Resources will be provided if needed.

Jazz Trombone

Freshman/ Sophomore Year

Required Materials-

- Instrument- either owned or rented through the school
- Slide oil (Teacher recommendation: Yamaha)
- Valve/Rotor oil (Recommendation: Hetman oil in *Medium* and *Light*)
- Notebook (for practice/ lesson journal) Paper or electronic is fine.
- Tuner (cell phone app is fine)
- Recording device (cell phone is fine)
- iReal Pro (app for iphone or android)

- Pencils (or tablet with stylus is choosing to learn electronically)

Required Lesson Books-

- *Scales for Jazz Improvisation*, Dan Hearle
- *The Real Book: Bass Clef Edition Vol. 6*, Hal Leonard

In their first two years of jazz trombone lessons, students will learn the basics of soloing, begin learning how to transcribe solos, start developing a working knowledge of jazz theory, and expand their knowledge of “jazz scales” and patterns. Students will be assigned one chart from the Real Book each lesson, with instructions to focus on a certain blues scale or key area in their practice. By the end of their sophomore year, jazz trombone students should be laying the framework for understanding more complex jazz charts.

Also in their jazz trombone lessons, students will be assigned basic jazz theory assignments, exposed to several jazz trombonists, and will be expected to begin learning about the history and development of jazz music.

Junior/ Senior Year

Required Materials-

- All materials from past two years
- Harmon mute
- Bucket mute

Required Lesson Books-

- All books from past two years
- *Sing it First*, Wycliffe Gordon
- *Jazz Theory: from Basic to Advanced Study*, Darius Terefenko

These two years of jazz trombone lessons are for students majoring in jazz trombone, or who have expressed interest in becoming a professional jazz musician. The second two years of lessons will focus more on developing the students' ear, further promoting their understanding of jazz theory and technique, and understanding all the different styles and methods of jazz. In lessons, students will continue to play charts from the real book, but they will now be expected

to transcribe at least two or three solos every month, in different styles. Students who wish to perform a jazz recital must demonstrate understanding of how to program a jazz concert, and have working knowledge of how jazz trombone works in smaller combo groups as well as big band jazz groups. Jazz trombone students will also be expected to perform in the jazz ensemble at the university.
